Cracked Tooth

**Not Sensitive**
- Leave as-is (Unprotected)
  - Benefit: No treatment performed
  - Risk: Tooth is vulnerable to fracture/sensitivity.

**Sensitive**
- Crown (Protected)
  - Benefit: May extend the life of the tooth and slow the progression of the crack
  - Risk: May trigger sensitivity.

Refer to an endodontist for evaluation of crack extension.

**If crack is minor**
- Root Canal & Build Up
- Crown

**If crack is major**
- Remove the tooth
- Tooth Replacement
